Securing an IT Organisation through Governance, Risk Management, and Audit introduces two internationally recognised bodies of knowledge: Control Objectives for Information and Related Technology (COBIT 5) from a cybersecurity perspective and the NIST Framework for Improving Critical Infrastructure Cybersecurity (CSF). Emphasising the processes directly related to governance, risk management, and audit, the book provides details of a cybersecurity framework (CSF), mapping each of the CSF steps and activities to the methods defined in COBIT 5. This method leverages operational risk understanding in a business context, allowing the information and communications technology (ICT) organisation to convert high-level enterprise goals into manageable, specific goals rather than unintegrated checklist models.

The real value of this methodology is to reduce the knowledge fog that frequently engulfs senior business management, and results in the false conclusion that overseeing security controls for information systems is not a leadership role or responsibility but a technical management task. By carefully reading, implementing, and practicing the techniques and methodologies outlined in this book, you can successfully implement a plan that increases security and lowers risk for you and your organisation.

Features

- Introduces COBIT 5 methods from a cybersecurity perspective
- Provides details of the cybersecurity framework (CSF) with emphasis on the processes directly related to governance, risk management, and audit
• Maps each of the CSF steps and activities to the methods defined in COBIT 5 which results in an extension of the CSF objectives with practical and measurable activities
• Leverages operational risk understanding in a business context, allowing readers to be proactive and competitive
• Conveys value to the ICT organisation's stakeholders, converting high-level enterprise goals into manageable, specific goals rather than unintegrated checklist models

This offer is valid until **31 May 2016** or while stock lasts. Get your copy now!
