

NETWORKING SESSION

LEAN SIX SIGMA: MECHANISM FOR SCIENTIFIC THINKING

PROGRAMME OUTLINE

Lean Six Sigma is a latest process improvement philosophy of the 21st century. Numerous organizations have embraced this philosophy for multitude of reasons. Amongst the many, some succeed and some don't. Applying Lean Six Sigma requires a meticulous planning process as to how it befits the strategic direction of the organization. The absence of such planning could derail the long term success of the philosophy. This networking session involves a fun role-playing game and an interactive half-day program which attempts to convey the gist of scientific thinking, which encapsulates the rudiments of Lean Six Sigma and the extent of its efficacy as well as it provides a quick insight on how internal auditors could perceive a business from the perspective of process and what value it caters for internal and external stakeholders.

ABOUT THE SPEAKER

For around 8 years, Mr. Muraliraj has been involved in process excellence projects, performance improvements, and change management in shipping, oil and gas, engineering, IT and BPO industries. His expertise includes Lean Six Sigma deployment, training, facilitation, strategic planning and project management activities in process improvement. His recent endeavor involves training and deployment of Lean Six Sigma in various industries ranging from power generation, renown national corporations, electrical and electronics, government-linked institutions amongst the many. To date, he had been involved in training and coaching approximately 198 Green Belters and 172 Black Belters amidst overseeing high level and technical specific projects such as maximizing or enhancing productivity, procurement optimization, reducing downtimes, reducing production cycle time, improving operational costs, strategic business transformation, auxiliary power optimization in plants, reducing errors, defects, defectives (PPM), optimizing inventory level and Reduce utility cost and consumption.
